

Does the "high cost" flag track independent hardship markers?

Traditional LIHC and HQRTM mostly don't; the restriction flag (low cost vs. structural need) does

Received energy-bill aid (S7)

Bill is a financial problem (C5B)

Cold home in winter (C1A)

Difficulty on present income (S8)

Odds ratio (95% CI) -- ">1" means flagged households more likely to report hardship
